EDUCATION

Oulu University of Applied Sciences

Bachelor of Engineering, Information Technology

Oulu, Finland

2020 – 2025

AWS Cloud Practitioner Certificate 2025

WORK EXPERIENCE

01.12.2023 – Present – **Junior Data Engineer, MUFG Investor Services, Limassol, Cyprus**

03.06.2022 – 01.08.2022 – Babysitter, Athens, Greece

29.12.2021 – 05.08.2022 – Book Illustrator, remote

At MUFG I was mainly working on processing big volumes of data in JSON and CSV formats through the Apache Nifi ETL tool while performing transformations and validations on data that were requested by clients and discussed with the business department.

Also, I worked closely with QA and business teams, my job included writing python scripts to add or optimize features that are not supported on Nifi and using complex SQL queries to filter data, assign configuration to files and store the file's data on each step from fetching or generating it to exporting it to destination.

A big part of my job was also debugging production issues and performing regression, unit and end-to-end tests.

LANGUAGES:

English – proficiency

Greek – conversational

Russian – native

HOBBIES:

Digital and traditional art, UI/UX Design
